

## Welcome to the centre of up-to-date diagnostics

We are pleased to welcome you to the practice “Radiologie am Raschplatz”, one of the best equipped practices in Europe. The team supporting radiologist Dr. Manfred Fricke uses the most modern methods when it comes to diagnostics and treatment. By using the latest digital technology available worldwide, we can ensure the best possible and most gentle examination methods and treatments.

Our practice, which is more than 1.000 square metres in size, is bathed in natural light and offers our patients an atmosphere of well-being. Numerous small waiting areas help prevent the feeling of a typical waiting room. The rooms are arranged in such a way that the individuality and privacy are maintained.

### Our latest acquisition – a 3 tesla MRI

With our latest acquisition, the most modern [3 tesla](#) magnetic resonance imaging (MRI) machine worldwide, we would like to offer you an even faster, more precise and accurate diagnostic tool. With this innovative, digital technique – without exposure to radiation – we have been able to successfully extend our already modern range of diagnostic tools.

Furthermore, we also have – amongst others – an open magnetic resonance tomography tool, which does not have a tube. This is beneficial in particular to patients suffering from claustrophobia or obesity.
